American Academy of Oral and Maxillofacial Pathology

ANNUAL MEETING & CONTINUING EDUCATION PROGRAM

APRIL 27 - MAY 2, 2001

CHICAGO, ILLINOIS

ADAC·E·R·P
CONTINUING EDUCATION RECOGNITION PROGRAM

The AAOMP is an ADA CERP recognized provider.

ABOUT CHICAGO AND THE DRAKE HOTEL

The Windy City. Home to Fortune 500 companies, international financial markets and world-championship sports teams including the Chicago Bulls, Bears, Cubs, White Sox and Blackhawks.

Enjoy Oak Street Beach, a beautiful stretch of sand and sun along Lake Michigan, located just outside the front door. Stroll along the Magnificent Mile. Visit Water Tower Place and the Avenue Atrium complexes, a dynamic mixture of shops, restaurants, theaters and department stores. North Michigan Avenue offers specialty shops, small boutiques, art galleries and antiques.

Many museums and theaters are within walking distance, including the Art Institute of Chicago. Other famous cultural spots include the Shedd Aquarium, Adler Planetarium, Field Museum, Historical Society and Museum of Science and Industry.

Located in the heart of the Gold Coast, The Drake is directly across from Oak Street Beach on the Magnificent Mile. If you're looking for exceptional access to all this and more, no other hotel is as convenient as The Drake!

The deadline for the block of rooms reserved by AAOMP is thirty days (March 27, 2001) prior to arrival. All rooms not secured with a one night's deposit will be released to The Drake's reservation office for resale. Reservation requests made after the cut-off date will be confirmed on a space available basis at the conference rate. The room rate per night is \$195 single/double occupancy. The special guest room rate will apply three days before and after the official dates of the AAOMP's meeting. All reservations must be accompanied by one night's deposit for room and tax.

The Drake
140 East Walton Place
Chicago, IL 60611
(312) 787-2200 or (800) 553-7253

GENERAL INFORMATION

REGISTRATION

Individuals are encouraged to register by mail as soon as possible to avoid delays on-site. Registration Forms postmarked on or after March 31, 2001 and individuals registering on-site will be charged an additional \$25.00 fee. A registration fee for spouses attending the meeting is being charged to offset a portion of the cost of the services which the academy provides them. You must register to attend any portion of the meeting. To register, fill out the enclosed Registration Form, attach your check payable in U.S. funds to American Academy of Oral & Maxillofacial Pathology (AAOMP), and mail both to:

AAOMP
710 E. Ogden Avenue, Suite 600
Naperville, Illinois 60563-8614 U.S.A.
Toll Free 888/552-2667 or 630/369-2406

Additional Office Information
Fax: 630/369-2488, E-Mail: aaomp@b-online.com
Jeanette Helfrich, Executive Director
Liz Lenard, Administrative Director

FELLOWSHIP EXAMINATIONS

The examination will be held Saturday, April 28, 2001 from 8:00 am - 5:00 pm. Applications to sit for the Fellowship Examination must be received by the AAOMP office by January 30, 2001. You may call 888/552-2667 for an application.

MICROSCOPES AVAILABLE

A formal WCTB will not be scheduled. However, microscopes will be available for slide review and informal consultations in the WCTB/CCA Room.

PRESIDENT'S MESSAGE

Ronald A. Baughman, DDS, MSD

Hopefully all of you have had a great summer filled with exciting vacations and relaxation. Now, its time for most of us to get back to work at our various tasks. Hopefully we are refreshed and excited.

In June we lost one of the true giants in our specialty when Dr. William G. Shafer passed away. His passing had special meaning for me because I did my residency at Indiana University where he was my program director. I asked Dr. Charles Tomich to prepare the obituary that appears in another part of this Newsletter. As all of you know, Dr. Shafer left a great and positive imprint on our specialty.

We owe a strong vote of thanks to John Wright, who oversaw and ramrodded our detailed response to the ADA Council on Dental Education and Licensure's Study of Specialty Recognition and Practice. John was assisted by a contingent of individuals who spent many hours preparing their individually assigned portions of the document to justify their continued existence as an ADA approved specialty. We should have no problem due to the outstanding work of our committee and the able guidance provided by John. Thanks again!

John started another project during his tenure as president that has just come to fruition. He worked hard to help develop a brochure to promote the services provided by oral and maxillofacial pathologists. The brochure is primarily designed for distribution by oral and maxillofacial pathology laboratories. At the time of this printing, over 16,000 brochures have been requested for purchase by our laboratories and 2000 will be used for distribution to attendees at the annual September meeting of the

American Academy of Oral and Maxillofacial Surgery in San Francisco. The brochure is in full color and the back panel has a blank space so the name and address of a specific laboratory can be placed there by rubber stamp or a printed stick-on label. I have ordered a large supply for our laboratory because I believe they will truly help to promote our services to potential clients. We will use them to mail to prospects, give to all senior dental students, hand out at state surgery and specialty meetings etc. I am sure there are other applications we have not even thought of that will surface in the future. I suggest that if you have a laboratory, you will do well to order a supply to help promote your laboratory's services. Many laboratories have already done so. You can request a single brochure from our Chicago office for review, or see it on our website soon (<http://www.aaomp.org>). Copies of the brochure can be purchased for \$200.00 per thousand.

Paul Auclair and I attended the Dental Specialties Group meeting in Chicago in July. Then Gordon Rick and I attended the annual meeting of sponsoring organizations and board presidents in August. Our specialties are working hard as a group to promote our common causes and to present a united front to the ADA and legislative bodies. There is always strength in numbers when people or groups with common needs work together. I believe it is very important that we maintain our activity with the other specialties for the mutual benefits of all.

It is already time for you to start planning for our next meeting in Chicago. Mark the dates on your calendar if you have not done so already (April 28 - May 2, 2001). Chicago is an exciting town and we will have outstanding educational programs, tours, and opportunities for good fellowship and special spouse activities. Don't miss the exciting options that await you.

CHICAGO SCHEDULE

Friday, April 27

2:00 pm Executive Council Meeting

Saturday, April 28

8:00 - 5:00 pm Fellowship Exam
8:00 - 5:00 pm Fellowship Committee
8:30 - 11:30 am CE #1 22nd Annual AFIP Seminar
1:00 - 5:00 pm Symposium
12:30 - 4:30 pm Tour 1 - Chicago Highlights
Sightseeing & Architecture Tour
5:30 - 10:30 pm Tour 2 - Second City &
Chicago-Style Pizza

Sunday, April 29

8:30 - 11:30 am CE #2 - Dr. Barnes
CE #3 - Dr. Baker
CE #4 - Dr. Wenig
10:30 - 4:30 pm Tour 3 - Shakespeare on Navy Pier
2:00 - 5:00 pm CE #5 - Dr. Helm
CE #6 - Dr. Eisen
CE #7 - Dr. Tying
6:00 - 7:30 pm Welcome Reception

Monday, April 30

7:00 - 8:00 am Editors Breakfast
8:00 - 12:30 pm Essay I
9:00 - 1:00 pm Tour 4 - Wright & Hemingway
in Oak Park
12:00 - 1:00 pm Program Directors Lunch
12:30 - 1:30 pm Army, Navy & Air Force Luncheons
2:00 - 5:00 pm Fellows Business Meeting
3:00 - 4:30 pm Spouses Champagne Reception
6:30 - 11:30 pm Tour 5 - Pub Crawl: Jazz & Blues
Chicago Style
9:00 - 10:30 pm Residents Reception

Tuesday, May 1

7:00 - 8:00 am Education Committee Breakfast
8:00 - 11:30 am Founders Memorial Seminar
9:00 - 12:30 pm Tour 6 - Chicago River Cruise &
Architectural Tour
11:30 - 1:00 pm Past Presidents Lunch
1:00 - 5:30 pm Essay II
6:00 - 9:00 pm Presidents Reception & Banquet

Wednesday, May 2

9:00 - 11:00 am Clinical Pathology Conference

TRAVEL TO THE DRAKE

From	Distance	Via
O'Hare Airport	20 miles	Taxi/Bus
Midway Airport	14 miles	Taxi/Bus
Union Railroad Station	2.5 miles	Taxi/Bus
Northwestern Railroad Station	2 miles	Taxi/Bus

WEATHER IN THE WINDY CITY

Temperature ranges from 70-92° F from April to September and 43-69° F from October to March.

2001 CONTINUED COMPETENCY ASSURANCE PROGRAM

The Academy is once again sponsoring a Continued Competency Assurance program (CCA). The registration fee for members is \$50 and \$65 for non-members should be included with your registration form. In the past, the CCA was available for Diplomates only, but on a trial basis, it will be offered to all AAOMP members at the Chicago meeting in 2001.

The AAOMP CCA is in a self-assessment format. Upon arriving at the meeting, participants should pick up their CCA packet from the registration desk. Each packet will contain self-assessment questions relevant to the CCA materials provided at the meeting along with an AAOMP CCA Participation Document.

The CCA cases will be available for review in the microscope room. See the Schedule at a Glance for times and location. The cases are individually packaged with appropriate histories, clinical photographs, radiographs and glass slides. Each of the 20 cases should be reviewed individually and completely and returned to their container. Upon completion of the CCA, each registrant should return the Participation Document to the registration desk. At that time, the diagnoses, discussion and references will be supplied for all cases presented.

The American Board of Oral and Maxillofacial Pathology will be provided with the list of completed participants.

MEETING PROGRAM AND SCHEDULE

Friday, April 27, 2001

2:00 pm

Executive Council Meeting

Saturday, April 28, 2001

8:00 am - 5:00 pm

Fellowship Examination and
Fellowship Committee Meeting

8:30 am - 11:30 am

CE Program #1

22nd Annual AFIP Seminar

Charles W. Pemble, COL, DMD, MSD

Gary L. Ellis, DDS

Esther L. Childers, COL, DS, USA

Douglas M. Arendt, DDS, MS

Donald Tyler, DDS

Kevin R. Torske, DDS

(Gary R. Warnock, DDS, MS)

The Armed Forces Institute of Pathology, in conjunction with the American Registry of Pathology, is a consultative reference center for pathology. An act of the United States Congress authorizes the AFIP to render consultative opinions on challenging and interesting cases from military and civilian pathologists worldwide. The Department of Oral and Maxillofacial Pathology is one of 23 departments within the AFIP and is responsible for administering and maintaining the Registry of Oral and Maxillofacial Pathology of the American Registry of Pathology. The staff of the Department of Oral and Maxillofacial Pathology will present atypical, unusual or uncommon lesions from the head and neck region that have been accessioned through the Registry. Emphasis will be placed on histopathologic differential diagnosis, adjunctive special laboratory procedures and the rationale used to arrive at a final diagnosis. Microscopic slides of the cases to be presented will be distributed to the participants in advance. Attendees are encouraged to submit their diagnoses for the cases to help guide the discussion during the seminar. Prior to the meeting, the first 50

registrants will receive glass slides of the cases that will be presented; **these slides need not be returned.** In addition, representative 2x2 slides of each case will be offered for purchase with delivery occurring after the meeting.

Objectives:

1. To present rare, unusual and challenging cases from the Registry of Oral and Maxillofacial Pathology of the American Registry of Pathology.
2. To discuss the development of clinical and histopathologic differential diagnoses for cases presented from the American Registry of Pathology.
3. To provide a rationale for the design and use of adjunctive histopathologic laboratory studies as deemed appropriate for the presented cases from the American Registry of Pathology.

Outcomes:

1. Allow participants the opportunity to examine and diagnose rare, unusual and diagnostically challenging cases.
2. Provide individual opportunity to develop clinical and histopathologic differential diagnoses with follow up assessment appropriate for the presented cases.
3. Develop a rationale for the application of adjunctive histopathologic laboratory studies as pertinent to the presented cases.

1:00 am - 5:00 noon

Symposium

Dr. Miriam Grushka

Dr. Ed Truelove

*"Burning Mouth and Taste with Emphasis on
Diagnosis and Management"*

12:30 pm

Tour 1: Chicago Highlights Sightseeing &
Architecture Tour

5:30 pm

Tour 2: Second City & Chicago-Style Pizza

MEETING PROGRAM AND SCHEDULE

Sunday, April 29, 2001

8:30 am - 11:30 am

CE Program #2

Dr. Leon Barnes, M.D.

“Selected Soft Tissue Tumors of the Head and Neck”

Participants will be provided with a set of microscopic slides and appropriate clinical histories for independent study. Each case will be discussed in detail, and a comprehensive manual will be distributed. **These glass slides must be returned at the meeting site.**

Objectives:

1. Acquaint the participant with a variety of benign and malignant soft tissue tumors of the head and neck.
2. Address important clinical, histological, immunohistochemical and cytogenetic features that are useful in differential diagnosis.

8:30 am - 11:30 am

CE Program #3

Dr. Karen Baker

“Innovative Therapies for Mucositis and Chronic Pain”

Therapeutic management of head and neck disorders has become even more challenging in recent years. Patients are increasingly medically complex and drug therapy choices are rapidly multiplying. This program is designed to update the dental practitioner on new developments in the treatment of oral mucositis and chronic stomatitis, lichen planus, benign mucous membrane pemphigoid, herpes simplex, herpes zoster, and candidosis. Since mucosal disease can be drug-induced, a listing of the causative agents will be provided along with an extensive discussion of prevention and treatment of xerostomia. Chronic pain disorders such as headaches, neuralgias, and burning mouth syndrome will be discussed with respect to patient-specific treatment modalities. New topical and systemic agents will be listed and evaluated. Extensive and very current handouts will be provided in order to maximize the take home value of this program.

Objectives:

1. To review the effectiveness of topical and systemic therapies for non-microbial mucositis.
2. To discuss patient-specific selection criteria for systemic and topical antifungals and antivirals.
3. To evaluate the cost/benefit of systemic antifungals and antivirals.
4. To review drug-induced intra-oral effects.
5. To outline strategies for preventing and/or treating xerostomia.
6. To review new approaches for pharmacologic management of vascular headache and orofacial neuralgias.

Outcomes:

After attending this program and reviewing the handouts, the participant should be able to:

1. Choose an effective topical corticosteroid for non-microbial mucositis treatment based on patient needs.
2. Prescribe an effective topical antifungal after treatment failure with topical nystatin.
3. List systemic antiviral regimens for chronic prevention as well as acute treatment of herpes simplex or zoster.
4. Discuss 4 strategies for managing severe xerostomia.
5. List indications and contraindications for systemic pilocarpine therapy for xerostomia.
6. Describe 3 new topical agents useful in treating chronic head and neck pain.

2:00 pm - 5:00 pm

CE Program #4

Bruce Wenig, M.D.

“Selected Lesions of the Head and Neck”

By the end of the seminar the attendee will:

1. Discuss and utilize 10 cases to illustrate difficult diagnostic problems in head and neck pathology. Will include selected nonneoplastic and neoplastic (benign & malignant) lesions of the head & neck, including the sinonasal tract, oral cavity, pharynx, nasopharynx, larynx, neck region (e.g., thyroid parathyroid, cervical lymph nodes), salivary glands and the ear.

MEETING PROGRAM AND SCHEDULE

2. Emphasis will be placed on the clinical and pathologic correlation of each disease.
3. The criteria for diagnosis by light microscopy will be detailed and supplemented (when needed) by special studies (e.g., histochemistry, immunohistochemistry, electron microscopy, molecular biology.)
4. Participants will be provided with a set of microscopic slides and appropriate clinical histories for independent study. **These glass slides must be returned at the meeting site.**

10:30 am - 4:30 pm

Tour 3: Shakespeare on Navy Pier

8:30 am - 11:30 am

CE Program #5

Dr. Klaus Helm

“Cutaneous Adnexal Tumors”

The diagnosis of cutaneous adnexal tumors can be challenging. Cutaneous adnexal tumors can resemble tumors arising in the oral mucous membranes. Correct diagnosis is important to ensure adequate treatment. A simple approach to the diagnosis and classification of adnexal tumors will be presented. Diagnostic aids such as the use of immunohistochemical marker studies will be discussed. Clinical photographs will supplement photomicrographs to provide clinical-pathological correlation.

Participants of the course will receive a set of 10 slides to review before the seminar which will be discussed during the presentation. **These glass slides must be returned at the meeting site.**

Objectives:

1. To be able to correctly classify sebaceous, apocrine, eccrine, and follicular tumors of the skin.
2. To learn a paradigm for the differential diagnosis of cutaneous adnexal tumors.
3. To become familiar with the immunohistochemical staining pattern of different tumors.
4. To become familiar with the biological behavior of different adnexal neoplasms

2:00 pm - 5:00 pm

CE Program #6

Dore Eisen, MD, DDS

“The Clinical Manifestations and Management of Oral Vesiculoerosive Diseases”

The oral and extraoral manifestations of various vesiculoerosive diseases will be presented. Emphasis will be placed on the management of these patients by both topical and systemic therapy. Methods of monitoring patients on these treatments as well as their potential adverse effects will also be addressed.

Objectives:

1. The recognition of oral and extraoral features of vesiculoerosive diseases.
2. The use of various topical preparations for vesiculoerosive diseases.
3. The use of systemic preparations for vesiculoerosive diseases.
4. How to monitor patients undergoing treatment with systemic agents for vesiculoerosive diseases.
5. The potential adverse effects of these systemic treatments.

2:00 pm - 5:00 pm

CE Program #7

Stephen K. Tyring, M.D., Ph. D.

“Dermatology and Viral Diseases”

Eight human herpesviruses have been identified and 11 antiviral drugs are Food and Drug Administration approved for their therapy. The herpesviruses are unique in that they all may cause primary infection, establish latency, and then reactivate if conditions of altered immunity develop. Over 30 antiviral drugs are now available for a variety of infections. Prophylactic vaccines are available for 12 viral infections and are much more effective (and cost effective) than antiviral drugs in controlling viral epidemics. These interventions are best utilized in conjunction with proper education and other public health measures.

Objectives:

1. Discuss new treatments and prevention for human papillomavirus infections

MEETING PROGRAM AND SCHEDULE

2. Discuss new treatments and prevention for human herpesvirus infections.
3. Discuss new treatments and prophylaxis for HIV infections.

6:00 - 7:30 pm

Welcome Reception

Monday, April 30

7:00 - 8:00 am

Editor's Breakfast

8:00 - 12:30 pm

Essay 1

9:00 - 1:00 pm

Tour 4: Wright & Hemingway in Oak Park Tour

12:00 - 1:00 pm

Program Directors' Lunch

12:30 - 1:30 pm

Army, Navy & Air Force Luncheons

2:00 - 5:00 pm

Fellows' Business Meeting

3:00 - 4:30 pm

Spouses' Champagne Reception

6:30 - 11:30 pm

Tour 5: Pub Crawl: Jazz & Blues Chicago Style

9:00 - 10:30 pm

Resident's Reception

Tuesday, May 1

7:00 - 8:00 am

Education Committee Breakfast

8:00 - 11:30 am

Founder's Memorial Seminar

Virginia LiVolsi, M.D.

"Interesting Cases in Thyroid Pathology"

Using specific cases, various autoimmune and neoplastic thyroid diseases will be illustrated, their histologic diagnostic criteria will be discussed and an update of molecular biology of certain thyroid tumors will be provided.

Objectives:

1. To review the diagnostic criteria for distinguishing benign from malignant papillary thyroid lesions.
2. To define oncocytism (Hurthle cell) proliferations of the thyroid.
3. To update information on the molecular features and diagnosis of medullary thyroid carcinoma.
4. To illustrate pathologic aspects of autoimmune thyroid diseases.

9:00 - 12:30 pm

Tour 6: Chicago River Cruise & Architecture Tour

11:30 - 1:00 pm

Past President's Luncheon

1:00 - 5:30 pm

Essay II

6:00 - 9:00 pm

President's Reception & Banquet

Wednesday, May 2

9:00 - 11:00 am

Clinical Pathology Conference

Air Travel Reservation Request Form

The air travel reservation request form is included in the newsletter for your convenience.

If you plan on making your travel arrangements through The Travel Desk, please complete the form and send it in.

If you misplace this form and need another one, please contact our office.

Thank you.

TOURS

The Academy is pleased to offer six exciting tours of the Chicago area. Each tour requires a minimum of thirty-five people. If the minimum is not met, we must unfortunately cancel the tour. Please register early.

Tour 1: Saturday, April 28, 2001

Chicago Highlights Sightseeing and Architecture Tour

Time: 12:30 - 4:30pm

Cost: \$36 per person. Includes deluxe sightseeing coach, professional tour guide, and all taxes and gratuities, admission to Sears Skydeck.

Chicago is the cradle of modern architecture, yet boasts some of the finest examples of neoclassical architecture in the New World. The result is a charming mix of styles set against the spectacular backdrop of Lake Michigan.

Immigrants brought remarkable skills at the turn of the century - ethnic neighborhoods reflect the cultures of their dwellers' origin or decent. Visit the Gold Coast, where the cattle barons and merchant millionaires of the turn-of-the-century built their palaces. Old Town, once a snug little neighborhood settled by German immigrants, today boasts gentrified brownstone walk-ups and secret gardens that flourish in the shadows of skyscrapers. You'll see Chinatown, with its unique Oriental architecture and myriad restaurants; the site of the great Colombian Exposition of 1893; the old neighborhoods once teeming with people of every nation and the legacy of gorgeous churches and synagogues they left behind.

Find out what makes "State Street that Great Street" and why Michigan Avenue is called "The Magnificent Mile." At the University of Chicago, you'll see Rockefeller Chapel, considered by critics to be the finest example of neo-Gothic architecture in the U.S. And of course, you'll see the famous museums and towering architectural wonders for which Chicago is internationally renowned.

No trip to Chicago would be complete without a visit to the Sears Tower Skydeck, on top of the tallest building in the world. We'll skyrocket almost 1,454 feet to the observation deck of the tower, for a most spectacular panoramic view of the city. It's a perfect way of putting everything in perspective.

ACCENT: Long Range Planning Committee - 2000 *Suggested Goals*

by
Ronald A. Baughman, DDS, MSD

Selected goals as set forth in LRPC report:

1. Within 3 years every AAOMP fellow will have joined and be active in a local and/or state pathology society.

It is very important that we, as oral pathologists, be actively involved with our medical counterparts. The availability of and access to local or state pathology societies varies from state to state and even within different regions of larger states. It is important to make our presence known by seeking active membership in available societies and taking advantage of opportunities to present educational programs as a benefit to those groups. Most medical pathology societies are constantly looking for experts to present programs related to their individual fields of interest. Simply expressing our willingness to share our expertise will usually open the door. As a group, general surgical pathologists feel very inadequate to diagnose oral lesions due to their lack of experience with an appreciable volume of oral cases. Presentations of oral pathology programs for medical pathology groups normally result in increased numbers of consultative cases coming to our laboratory services. That is, of course, a benefit to our future success. I have presented programs for my state and regional pathology societies several times over the years and they have always paid off by producing many positive relationships and numerous consultations from around the state. The same can happen for your service if you have not already achieved it.

2. Within 3 years AAOMP will offer a course at each annual meeting of AAOMS.

As luck would have it, the new president of AAOMS is Dr. Frank Diplacido of Ft. Myers, Florida – a long time friend of mine. We were together at the Dental Specialties Meeting in Chicago the last week of July providing an opportunity for us to discuss this Committee recommendation. He was in full agreement with this proposal. I am asking Susan Zunt, our Director of Education, to contact her AAOMS counterpart to explore implementation of this objective.

TOURS

Tour 2: Saturday, April 28, 2001 Second City & Chicago-Style Pizza

Time: 5:30 - 10:30pm

Cost: \$65 per person. Includes transportation aboard deluxe sightseeing coach, professional tour guide, unlimited tap beer, soft drinks, deep-dish pizza and salads, tickets to Second City Theater, and all taxes and gratuities.

Enjoy delicious Chicago-style pizza in the town that made pizza famous. You'll love the gourmet pizza served at Connie's, one of the city's oldest and most famous pizzerias. You have all the deep-dish pizza you can eat, plus unlimited tap beer, house wine and soft drinks.

Then it's on to Second City for a few hours of hilarity in the nation's most successful improvisation theater. This is the theater that has given us a 25-year tradition of comedy ranging from Nichols and May in the early '60s to the Belushi brothers, Chevy Chase and Bill Murray of "Saturday Night Live" famous today. Always a complete sell out, this is Chicago's most popular theater nightclub.

Tour 3: Sunday, April 29, 2001 Shakespeare on Navy Pier

Time: 10:30am - 4:30pm

Cost: \$85 per person. Includes transportation aboard a deluxe sightseeing coach, ticket for performance, lunch at Riva, and all taxes and gratuities.

In the heart of Chicago's vibrant downtown and in a beautiful courtyard style theater just like those he wrote for, Shakespeare's work comes to life. Performances in the new theater, styled after the Globe in England, are powerful, emotional, and intimate with the actors and audience just feet away from one another. There is a lively convergence of culture and commerce and a breathtaking view of the city skyline. Four hundred years after the original a new theater has emerged in Chicago's renowned Navy Pier. Come spend the afternoon with Shakespeare and enjoy a fabulous lunch at the celebrated Riva restaurant, which also happens to call Navy Pier home.

Tour 4: Monday, April 30, 2001 Wright & Hemingway in Oak Park

Time: 9:00am - 1:00pm

Cost: \$60 per person. Includes transportation aboard deluxe sightseeing coach, professional tour guide, tours of the Hemingway Home & Museum, and all taxes and gratuities. Snacks are passed at noon.

The morning begins with a visit to the Frank Lloyd Wright Home and Studio in Oak Park. Wright designed the house in the new Prairie style for his bride when he was only 22 years old. The studio was added several years later, when Wright's business had begun to flourish. A major restoration has recently returned the home to its 1889 condition.

Of his many accomplishments, Wright was perhaps most proud of Unity Temple. A visit to this glorious house of worship affords guests an opportunity to see the magnificent proportions of one of Wright's public buildings.

Next, participants will visit the Hemingway Museum. The first twenty years of Ernest Hemingway's life are the subject of the museum's exhibitions. Permanent exhibitions highlight four main themes; Hemingway's family life, the important role the outdoors played in his development, his education in the Oak Park public schools, and his pivotal experience in World War I. Temporary exhibitions deal with topics such as Hemingway's work in film and his involvement in World War II.

Finally, visit the graceful Victorian house, the home of his maternal grandfather, where Hemingway was born and spent his childhood surrounded by his extended family. Displays in the home include historic photographs that document the family's history and highlight its impact on the young Earnest, and period furnishings that re-create the turn-of-the-century atmosphere.

Tour 5: Monday, April 30, 2001 Pub Crawl: Jazz & Blues Chicago Style

Time: 6:30 - 11:30 pm

Cost: \$70 per person. Includes transportation aboard deluxe sightseeing coach, guide/escort, complete dinner in Greek Town with wine, cover and one drink at Andy's

TOURS

Jazz Club and Buddy Guy's Legends, and all taxes and gratuities.

No visit to the city is complete without taking in the shows at clubs featuring Chicago style jazz and blues. Following a delicious dinner featuring a presentation of many flavorful ethnic dishes at a popular restaurant in Chicago's colorful Greek Town, guests will visit Andy's Jazz Club and Buddy Guy's Legends for Blues as only can be found in Chicago. Enjoy live music at two of the most popular clubs in Chicago.

Tour 6: Tuesday, May 1, 2001

Chicago River Cruise and Architecture Tour

Time: 9:30am - 12:30pm

Cost: \$43 per person. Includes deluxe transportation, professional tour guide, boat tour led by a docent of the Chicago Architecture Foundation, land tour to follow, and all taxes and gratuities.

The Chicago River is the heart and soul of the city, and the buildings, which line the river, are some of the most diverse and highly regarded in the world. Board a boat and take a special 1 1/2 hour cruise up both branches of the Chicago River, as the history of the city and the wonders of the modern commercial center are revealed.

You'll learn about the surge of building after the Great Chicago Fire, and how the fire enabled the city builders to start anew. The mixture of architectural styles lining the river is fascinating - historic 19th century railroad bridges and warehouses, classic 20th Century bridge houses, the Gothic Tribune Tower, sleek and modern skyscrapers and Art Deco monuments both new and old. Your guide will point out to you the manner in which many of the newest buildings "pay homage" to the older ones by mimicking some of their architectural details. Even if you know nothing about architecture, you'll absolutely love this tour.

Following the river tour, guests will continue on by motor coach to see important architectural sights not visible from the water. Interiors of the Rookery, Board of Trade and IBM buildings will be explored.

In Memorium **Dr. Thomas B. Aufdemorte** by **Dr. Anne Cale Jones**

Dr. Thomas B. Aufdemorte passed away Saturday, September 30, 2000 following injuries received in a motorcycle accident. Tom received his Doctor of Dental Surgery degree in 1977 from The University of Texas Health Science Center at San Antonio. His postdoctoral training included a three-year Residency in General Anatomic and Surgical Pathology at The University of Texas Health Science Center at Antonio and affiliated teaching hospitals. This was followed by a two year Fellowship on Oral, Head and Neck Pathology. These programs led to board certification by The American Board of Oral and Maxillofacial Pathology in 1982.

Tom was a Professor with tenure in the Department of Pathology at The University of Texas Health Science Center at San Antonio and directed the Division of Oral, Head and Neck Pathology. He also held academic appointments in the Department of Otolaryngology Head & Neck Surgery and the Division of Oral and Maxillofacial Surgery.

His research interests included the development and evaluation of models for bone healing and regeneration. He also evaluated host responses to bone growth factors and developed a variety of implantable biomaterials. He performed research funded by the NIH as well as by private industry and served as both a consultant and an investigator. His research was presented at national and international meetings and resulted in numerous publications in peer reviewed journals.

Tom loved his job as was demonstrated by his popularity with faculty, staff and students. He also loved his motorcycle and car. He is survived by his loving wife, Karen, of Blanco; a stepson, Daryl Burns of the United States Navy, stationed at Great Lakes, IL; daughters, Christy Flaczynski, of Austin and Lori Aufdemorte, of California. Memorials may be made to the American Heart Association or the Dr. John Cornyn Memorial Scholarship Fund and The University of Texas Health Science Center, 7703 Floyd Curl Drive, San Antonio, TX 78284-7750.

In Memorium
William Gene Shafer, DDS, MS
1923 - 2000

by
Dr. Charles E. Tomich

Dr. William G. Shafer, Indiana University's Distinguished Professor Emeritus of Oral Pathology and one of the world's most influential pioneers in the field of oral pathology, died in Indianapolis, Indiana, on June 17, 2000. He was 76 years old at the time of his death.

Serving on the Indiana University faculty from 1950 to 1985, for most of that time as Chairman of the Department of Oral Pathology, Dr. Shafer quickly developed a reputation as a brilliant and exacting diagnostician and teacher of oral pathology. But his vast knowledge of the field reached far beyond the walls of the IU dental school. Perhaps this was because of his notable work, *A Textbook of Oral Pathology*, for which he served as senior author. Considered for decades to be the definitive text on oral pathology, the book was published in four editions between 1958 and 1983. It was translated in the Spanish and Portuguese languages as well.

Dr. Shafer was born in Toledo, Ohio, on November 15, 1923. He was awarded degrees in 1947 from the University of Toledo (B.S.) and The Ohio State University College of Dentistry (D.D.S.). In dental school he was inspired by his oral pathology teacher, the late Hamilton B.G. Robinson, to consider pathology as a career. Dr. Robinson ("Ham" to many of us), was one of the eight founding fathers of the specialty of oral pathology in the United States. Thus, after earning his dental degree, Dr. Shafer completed a master's degree in general pathology at the University of Rochester (New York) in 1949. He was also an Eastman Fellow at the University of Rochester.

Ours was a little known field when Dr. Shafer launched his career in 1950 as a histopathology teacher at Indiana University. Oral pathology had been a specialty for only four years and most dental schools did not know much about it. In an interview in 1989, Dr. Shafer said, "Teachers wishing to enter this field had to develop it first. We were learning oral pathology by the seat of our pants."

In the early years after oral pathology became a recognized specialty, Dr. Shafer was among the nation's oral pathologists – a very small number of people at that time – who traveled to countless dental meetings across the country to acquaint dental practitioners with the field and to underscore the critical role that soft tissue examinations play in the overall well-being of patients' oral health.

He established an oral pathology graduate program at Indiana that became an advanced specialty training site for dentists in the U.S. Air Force and the U.S. Navy as well as for students the world over. More than 60 men and women trained in oral pathology at Indiana and many have gone on to distinguished careers in oral pathology and dental education.

Working with a team of faculty members and graduate students, he developed the oral pathology diagnostic service at Indiana that became an invaluable and much-trusted resource for thousands of dentists in the nation. It was at some point, probably sooner rather than later, that he became known as "The Chief." Within a scant decade, he rose from a senior dental student to President of the American Academy of Oral Pathology. He was a Diplomat, Secretary-Treasurer, and President of the American Board of Oral Pathology.

Dr. Shafer's research interests included studies on salivary gland pathophysiology, oral premalignant and malignant lesions, and investigations of odontogenic cysts and tumors. In the 1970's, Dr. Shafer was appointed to the World Health Organizations (WHO) International Reference Centre for Histologic Definition and Classification of Odontogenic Tumours, Jaw Cysts, and Allied Lesions, and of the WHO Collaborating Centre for Oral Precancerous Lesions, which established definitions of leukoplakia and related lesions. He was the only American oral pathologist to serve on both reference centres.

Dr. Shafer was appointed National Civilian Consultant in Oral Pathology to the Surgeon General of the U.S. Air Force and served in the capacity from 1960 to 1981. In this position, he visited Air Force bases all over the world, giving lectures and examining the facilities. Throughout his career, he was a much sought after consultant and lecturer at scientific meetings in the U.S. and abroad.

In 1970, Dr. Shafer was selected as one of the 100 outstanding alumni of The Ohio State University. A year later, Indiana University awarded him the rank of Distinguished Professor of Oral Pathology. Other honors include the Armed Forces Institute of Pathology Medallion, the prestigious Callihan Award from his alma mater, The Ohio State University, and the Maynard K. Hine Award, the highest honor bestowed by the Indiana Dental Association.

"The Chief" will be remembered by his former students, residents, and colleagues for his dedication to his work, his demanding work ethic, his diagnostic acumen, and his colorful and sometimes sharp discourse. But we all should remember him as a pioneer, leader and visionary in oral pathology. To many of us, The Chief was *non pareil*.

Dr. Shafer's remains are buried in the Washington Park Memorial Cemetery in Indianapolis. Carved in the headstone beneath his name are the dates indicating his presence here on earth and the title by which we addressed him most often – THE CHIEF.

Dr. Shafer is survived by his wife, Ruth Hertweck Shafer; daughter Susan E. Shafer; three granddaughters; and a great-granddaughter.
